

Your Current Process

- Are you a distribution company working with both in-house and external drivers?
- Do you manually process a large number of delivery orders each year? The photo vividly illustrates notes of a single day all of which had to be processed manually until now!
- Piles of paperwork result in high administrative effort including input errors...

Solve It with TSG unify

- Experience seamless, paperless data transmission.
- Just seconds after unloading, your delivery data is available online to dispatchers, drivers and customers.
- No more carbon copies of delivery notes.
- Errors from manual entry are eliminated.
- Flexible data interfaces ensure seamless integration into your existing office systems.

Smart Digitalization

- TSG unify is THE solution for your mixed fleet.
- It is compatible with various measuring systems from different manufacturers and connects via plug & play.
- The terminals are extremely robust and proven in real-world conditions.
- Benefit from this cloud-based data service that ensures complete traceability and data validation.

Maintenance-Free Operation

- Installation is simple and quickly ready to use.
- TSG unify terminals installed in fuel trucks operate silently in the background, maintenance-free, without batteries or rechargeable components.
- Software updates are transmitted remotely directly to the fuel truck, no downtime due to workshop visits.
- Delivery data and technical system monitoring are fully ensured via the centralized Service Center.
